MUKESH PATEL SCHOOL OF TECHNOLOGY MANAGEMENT & ENGINEERING

Shivani Mittal
BTech Computer Engineering (2023-2027)
Date of Birth: 17/09/2005
shivanimittal1705@gmail.com
www.linkedin.com/in/shivani-mittal-745a272a7

Summary

Computer Engineering undergraduate with a strong foundation in Cybersecurity, Data Engineering, and Software Development. Proficient in Python, SQL, Java, and web technologies. Developed projects in security monitoring, machine learning, and application development, with internship experience in data engineering and Databricks technologies.

Education

MPSTME, NMIMS University – B.Tech Computer Engineering **2023-2027**
CGPA: 3.16/4

Seedling Modern Public School, Udaipur **2022-2023**
CBSE: 67.8

St. Mary's Convent Senior Secondary School, Udaipur **2020-2021**
CBSE: 85.8

Projects

Honeypot Login Monitoring System - 2026
Developed a Flask-based login honeypot with SQLite logging, brute-force detection, risk scoring and an analytics dashboard.

RootLens - AI-Powered Cloud Incident Detection & Diagnosis System - 2026
Developed an AWS-based pipeline using Lambda, CloudWatch, EventBridge, and Gemini to detect application faults, diagnose likely causes, and display incidents on a real-time dashboard.

TRACE-X - Explainable Digital Forensics & Anti-Forensic Detection System - 2026
Developed a Python/FastAPI and React-based digital forensics platform to reconstruct event timelines, detect suspicious patterns, correlate evidence using graphs, and generate explainable investigation reports.

TravelMate - Android Mobile Application - 2025
Developed a Java/Firebase hotel booking application using MVVM with authentication, bookings, reviews and real-time room availability.

PaisaPilot - 2026
Developed PaisaPilot, an AI-powered personal finance app integrating expense tracking, budgeting, ML-based transaction categorisation, spending forecasts, anomaly detection and a RAG-based chatbot.

Work Experience

Celebal Technologies – Data Engineer Intern **(May 2026 - Aug 2026)**
Strengthened Python and SQL skills through data manipulation exercises, query development, and hands-on technical learning.
Explored the Databricks ecosystem, including Lakebase and Databricks Apps, to understand data workflows and application development.
Completed Databricks Partner Academy modules on Lakebase + Apps Go-to-Market and Selling Genie to Business Users, gaining exposure to data platforms and AI-powered analytics.

Certifications & Publications

Managing Projects with AI - Coursera (Sep 2026) | Ethical Hacker - Cisco Networking Academy (Sep 2026) | AWS Academy Graduate - Cloud Architecting (Oct 2026) | Python Course for Beginners - Scaler (May 2024) | Databricks Lakebase + Apps Go-to-Market | Databricks Selling Genie to Business Users | PaisaPilot - Research Paper Accepted at Conference for Publication in Springer Proceedings.

CORE SKILLS

Programming: C, C++, Java, Python, JavaScript, SQL, R
AI / Data Engineering: TensorFlow, Keras, OpenCV, Computer Vision, Deep Learning, Transfer Learning, Databricks
Development: Node.js, React.js, Next.js, Android Studio, Firebase, MVVM, AWS Cloud Architecting
Databases: MySQL, Oracle SQL, SQLite, Firestore, Supabase
Tools: Git, GitHub, VS Code, Jupyter Notebook, Pandas, Matplotlib, MATLAB, Excel
Cybersecurity: Flask, Authentication Systems, Honeypot Systems, Brute Force Detection, Risk Scoring
Soft Skills: Leadership, Problem Solving, Analytical Thinking, Team Collaboration, Communication, Adaptability.

Achievements and Positions of Responsibility

Finalist - OpenAI Hackathon, Semi Finalist - Vguard Hackathon, Finalist-LYB Mumbai Hackathon 2026
Sub Head - Digital Creatives - ACM-W | Feb 2025 - Jan 2026
Senior Executive - Colloquium (Entrepreneurship Cell) | Nov 2024 - Apr 2025
Executive - Social Impact | Feb 2024 - Apr 2024
Volunteer – Tara Sansthan | May 2024 – June 2024
